**Subject:** RE: National Mining Team Monthly Call

Shahid,

Is there a way to get better details about the Gold King release? My managers want to know if we have any similar issues and I am not sure from the press stories what was actually going on and I am sure Region 8 is very busy. It seems like they were excavating an adit to install some type of outlet control and maybe breached something holding back the water within the adit. Do you have any better info?

Thanks

Ed
